[SYNTHETIC TEST FIXTURE — invented content for automated tests; not research by any publisher]

Synthetic Office Export Note

By 2030, synthetic data-centre demand doubles in this invented model, and the grid queues that serve it lengthen every year.

Operators describe an AI-
driven build-out that strains the grid, and the sig-
nal from interconnection studies is that waits are lengthening.

Grid queues

Grid queues doubled in two synthetic years.

Interconnection studies slowed in every synthetic region we model, and transformer deliveries stretched beyond two years.

Grid queues doubled in two synthetic years.

Outlook

Synthetic utilities plan capex up 18% this year, much of it for transmission upgrades.
